YEARS TOTAL EXPERIENCE

9

YEARS UX & INTERACTION DESIGN

13

YEARS VISUAL & UI DESIGN

PROFILE

Across 22+ years of enterprise design, I have delivered interaction-rich B2B SaaS solutions. At Geni and TenXengage, I brought architectural depth to Google and Cisco partner ecosystems, designing everything from granular interaction patterns to end-to-end user journeys and information architectures. My practice builds from the skeleton outward, structuring navigation and research before crafting the visual layer. The UX Architect designation I earned at TenXengage reflects this structural and systems thinking. I integrate AI orchestration (Claude, Gemini, Antigravity) to accelerate research synthesis and user stories, working natively inside Agile sprints to ensure seamless handoffs and design fidelity.

EXECUTIVE VALUE PROPOSITION

Interaction Complexity Reduction

Translating complex enterprise workflows, data structures, and multi-role partner portals into clear, intuitive interaction patterns for global B2B users (Google and Cisco).

Architecture-First Design Craft

Approaching UX from the structural skeleton outward - IA, navigation models, and system-wide patterns before surface-level interaction and visual design.

Research-Grounded Design

Every design decision backed by real user research - contextual inquiry, usability testing, and behavioral analysis driving interaction patterns, layouts, and user flows.

AI-Augmented UX Workflow

Integrating AI tools (Claude, Gemini, Antigravity, Framer) into the design workflow, accelerating research synthesis, journey mapping, and design documentation.

Enterprise B2B UX Craft

Deep experience designing multi-role, permission-based interfaces for complex B2B SaaS - partner portals, healthcare networks, fintech platforms, and AI-powered dashboards.

Agile-Integrated Design Delivery

Delivering design within sprint cycles - wireframes, specs, and design QA embedded in the engineering delivery loop. Agile fluency as a practical delivery advantage.

CORE COMPETENCIES

Interaction Design and UX Craft

- User flows, wireframing (low-to-high fidelity), interactive prototyping
- Multi-state and multi-role interaction pattern design for enterprise B2B
- Micro-interaction design and UI behavior specification
- Visual hierarchy, typography, layout systems, and responsive design

User Research and Usability

- Contextual inquiry, field research, stakeholder interviews, survey design
- Usability testing - moderated and unmoderated, heuristic evaluation
- Journey mapping, empathy mapping, persona creation, competitive analysis

Information Architecture

- Navigation model design - multi-role, multi-hierarchy, enterprise-scale B2B
- Data schema and content hierarchy definition for complex SaaS workflows
- Structural pattern design - scalable and consistent across platform touchpoints

Enterprise B2B, AI Interfaces and Tools

- Partner portal UX - Google and Cisco ecosystems (22+ years experience)
- AI interface design - conversational, human-in-the-loop, LLM-powered products
- Accessibility - WCAG 2.1 compliance and inclusive design standards
- Figma, Framer, Miro, Sketch, Anima, Claude, Gemini, Antigravity
- Agile UX Delivery - design embedded in sprints

AI UX TOOLKIT AND DESIGN METHODOLOGY STACK

UX & ARCHITECTURE TOOLS

Figma (IA mapping, flows, component systems), Framer (interactive prototyping), Miro (journey mapping, structural workshops), Sketch, Anima

AI ORCHESTRATION

Antigravity, Gemini, Claude, Codex, Open Design, Google Stitch, Google AI Studio, UX Pilot

AI-AUGMENTED WORKFLOWS

Using Claude, Gemini and Antigravity for IA synthesis, journey map generation, user story drafting, acceptance criteria writing, and design documentation acceleration

AI-ASSISTED DEVELOPMENT

Translating UX architecture into fully functional applications and production-ready code (Laravel, PHP, MySQL, Frontend) by orchestrating AI agents, bridging the gap between design and technical execution.

RESEARCH & UX FOUNDATIONS

Prompt Engineering for UX Research, WCAG 2.1 Accessibility, HCD, Design Thinking, Lean UX

FRAMEWORKS

Human-Centered Design, Information Architecture, Design Systems, Lean Product Lifecycle, Agile UX Integration

ENTERPRISE PRODUCT DESIGN - FEATURED WORK

Asparz

UX Consultant & Architect

Enterprise SSL Management SaaS

Led deep-dive UX research and architected an actionable dashboard for IT administrators, simplifying dense cryptographic data. Designed predictive alerting mechanisms and streamlined renewal workflows, drastically improving data visibility and platform adoption.

Govt Guest Booking

AI Product Architect

100% AI-Driven Platform Development

Architected and deployed a fully functional booking platform by utilizing AI as an integrated engineering partner. Bridged the gap between UX vision and technical execution by orchestrating AI to generate a functional frontend, robust backend logic, and complex RBAC systems, proving design feasibility at scale.

Design OS for AI

Conceptual Framework

Knowledge Engineering

Pioneering a conceptual framework to transfer high-level human design intuition into AI models. Systematically teaching human-centered design to AI agents, translating complex design principles into structured, programmable logic for autonomous architectural decisions.

tenXengage

UX Architect

Workflow Redesign (Cisco & Google)

AI predicted business outcomes, but users still faced 40+ manual steps. Diagnosed the cognitive load gap, restructured the UX architecture, and delivered wireframes to redirect AI assistance directly to the creation flow.

Outcome: 30% engagement rise, 22% support cost drop, 20-25% ticket reduction.

[VIEW CASE STUDY](#) | [uxsayantan.com](#)

SmartBI

Lead UX Architect

Antigravity, Gemini, Claude, Google Stitch, Figma

Architected an enterprise conversational AI platform that translates complex SQL queries and multi-layered data into an intuitive natural language interface. Designed the human-in-the-loop verification layer, data transparency architecture, and zero-trust security UX compliance model for non-technical enterprise stakeholders.

SYSTEMS
THINKING

Feel the
experience

TRACTO

Lead UX Architect

Connected Healthcare Network

Designed a data-driven safety and health monitoring ecosystem for elderly care. Mapped real-time biometric streams to cognitive safety triggers, establishing glanceable, high-contrast dashboard interfaces engineered specifically for low-literacy and low-tech-proficiency users.

PROFESSIONAL EXPERIENCE

Freelance UX Consultant & AI Product Architect

Jan 2020 - Present

Independent Consultant

Strategic UX Consultant and Lead Researcher bridging the gap between deep human insights, enterprise architecture, and high-velocity technical execution.

- Led deep-dive UX research and designed predictive alerting mechanisms for enterprise SSL management platforms, drastically improving data visibility and platform adoption.
- Single-handedly architected and developed a comprehensive, multi-tiered booking platform by orchestrating AI as an integrated development partner.
- Pioneering workflows that leverage AI to generate production-ready PHP/MySQL backend logic, dynamic HTML/CSS/JS frontends, and robust RBAC systems.
- Building a foundational "Design OS" methodology to transfer high-level human design intuition into LLMs, shifting AI from code generator to strategic design partner.

Note: Geni restructured into TenXengage in Oct 2023. Same founding team, clients (Google, Cisco), and projects continued. Formally elevated to UX Architect in recognition of systems architecture responsibilities handled since joining predecessor entity Geni.

Strategic UX Architect leading end-to-end user experience and interaction design within Google and Cisco partner networks, engineering scalable B2B frameworks through rigorous Agile collaboration.

ENTERPRISE UX & ARCHITECTURE

- Applied systems thinking to map and optimize complex B2B SaaS workflows across Google and Cisco partner ecosystems, defining intuitive navigation models, data schemas, and platform-wide information architecture that scaled across global implementations.
- Directed overarching UX strategy for multi-regional partner portals, establishing structural design standards and governance frameworks that unified experience quality across all partner-facing touchpoints.
- Led end-to-end user research and journey mapping initiatives, translating behavioral insights and field observations into concrete architectural blueprints, feature roadmaps, and validated interaction models that drove measurable reduction in task completion friction.

TECHNICAL UX & AGILE COLLABORATION

- Facilitated engineering feasibility reviews at design inception, aligning UX proposals against API constraints, technical dependencies, and systemic limitations before committing to sprint scope, eliminating late-cycle redesign loops.
- Translated complex UX layouts and multi-state user flows into refined sprint backlogs, well-structured User Stories, and precise Acceptance Criteria ensuring engineering teams had unambiguous, dev-ready specifications at every handoff.
- Maintained design integrity across the full sprint lifecycle by proactively resolving cross-functional UX dependencies, clearing blocking issues, and conducting design QA reviews prior to release.
- Served as the primary interface between business stakeholders and engineering teams, protecting the user vision during implementation while aligning delivery against business KPIs and sprint velocity.
- Acted as Agile champion across cross-functional pods, facilitating sprint planning, daily stand-ups, retrospectives, and sprint reviews while simultaneously owning the design backlog.
- Integrated AI tools (Claude, Gemini, Antigravity) into sprint workflows, generating draft user stories, acceptance criteria, and sprint retrospectives, cutting documentation time and accelerating backlog readiness.

Geni

Feb 2021 - Sep 2023

Note: Predecessor legal entity to TenXengage (uninterrupted employment with same team, clients, and projects). Performed UX Architect & Researcher duties throughout under the title Sr. UX Designer.

ENTERPRISE UX & ARCHITECTURE

- Architected information structures for complex B2B SaaS partner portals across Google and Cisco ecosystems, defining end-to-end navigation models, data schemas, and content hierarchies that formed the structural backbone of multi-role platform experiences.
- Established foundational UX strategy and design standards across partner-facing platforms, creating structural frameworks, pattern libraries, and governance guidelines that ensured consistency and scalability across global rollouts.
- Led comprehensive user research initiatives (contextual inquiry, interviews, card sorting, tree testing) and journey mapping workshops, transforming qualitative findings and behavioral metrics into validated architectural blueprints and experience frameworks.

TECHNICAL UX & CROSS-FUNCTIONAL EXECUTION

- Conducted engineering alignment sessions at design inception, evaluating UX proposals against technical feasibility, API structures, and platform constraints to eliminate costly late-cycle rework.
- Translated complex interaction models and multi-state user flows into structured design specifications, user stories, and acceptance criteria providing engineering teams with unambiguous, sprint-ready handoff documentation.
- Maintained design integrity across delivery cycles, resolving cross-functional dependencies, conducting design review checkpoints, and ensuring implementation fidelity against original UX intent.
- Functioned as the bridge between business stakeholders and engineering, translating strategic goals and user needs into a shared delivery language, protecting the user vision through every sprint.

FastCollab

May 2020 - Feb 2021

- Architected an AI-driven corporate travel and forex solution platform, simplifying complex business logic into frictionless, linear screen architectures through iterative wireframe cycles.
- Collaborated within an Agile delivery structure where daily syncs, sprint demos, and retrospective-driven design iterations reduced rework across engineering sprints.

- Executed end-to-end UX strategy for a diverse B2B SaaS portfolio, managing design sprints grounded in intensive user research and core business KPIs.
- Led stakeholder alignment sessions that translated abstract product visions into structured user stories and sprint-ready low-to-high fidelity prototypes.
- Coordinated cross-disciplinary teams (design, development, QA) through Agile-style delivery loops, reducing post-sprint design revision cycles significantly.

- Managed design output for multi-client product teams, translating abstract client visions into comprehensive user stories, dev-ready prototypes, and sprint documentation.
- Established design review cadences aligned with sprint ceremonies, preventing implementation drift and reducing engineering rework.

- Conceptualized the Main Game Table interaction model, optimizing interaction patterns iteratively through rapid usability cycles to minimize cognitive load for millions of concurrent users.

CAREER EVOLUTION (2003-2012)

HurixDigital

Lead UI Designer (2011-12)

Nat Geo, Star India

Client Projects

RoyTech Software

UI Manager (2008-11)

Freelance

Visual Identity (2005-08)

Aforeserve.com

Jr. Web Designer (2003-05)

PROFESSIONAL CERTIFICATIONS

- **IIT Roorkee** - Executive Postgraduate Certification in UI/UX Design (2024-25) - cognitive psychology, enterprise navigation frameworks, data display mechanics.
- **IxDF** - AI for Designers Professional Certification (2026) - AI orchestration, LLM prompt refinement, human-in-the-loop UX.
- **IxDF** - Perception and Memory in HCI and UX - cognitive load principles applicable to complex interface design.
- IxDF Profile: ixdf.org/members/sayantantghosh

EDUCATION

- **Arena Animation** - Professional Diploma in Web Design and Multimedia
- **West Bengal Council of Higher Secondary Education** - Commerce Stream (10+2), 2001
