22+
YEARS TOTAL EXPERIENCE

9
YEARS UX & PRODUCT DESIGN

13
YEARS VISUAL & UI DESIGN

PROFILE

Across 22+ years in enterprise product design, I have led the end-to-end lifecycle of complex systems: Discovery, IA, interaction design, and validation. At Geni and TenXengage, I designed within Google and Cisco partner networks, translating business goals into user-centered SaaS experiences that delivered a 15% uplift in verified partner satisfaction. My work on SmartBI demonstrates this impact: architecting a conversational AI interface that simplifies complex database querying for enterprise users. I combine UX architecture and research rigor with modern AI orchestration (Claude, Gemini, Antigravity) to accelerate backlog readiness and sprint delivery, conducting design QA on deliverables directly against dev constraints.

EXECUTIVE VALUE PROPOSITION

Complexity into Clarity Transforming multi-layered enterprise workflows and data systems into intuitive, user-centered product experiences proven across Google and Cisco partner ecosystems at global scale.	End-to-End Product Ownership Driving the full product design lifecycle - discovery, user research, structural IA, interaction design, prototyping, and validated delivery - with UX architecture as the foundation.	Business-Product Alignment Translating stakeholder visions, user research, and business KPIs into product strategies and measurable outcomes. 15% verified satisfaction uplift delivered across partner portals.
AI Product Design Leadership Architecting human-in-the-loop AI product experiences - conversational interfaces, LLM-powered workflows, and intelligent UX systems (SmartBI, Sentinel, Tracto).	Research-Led Product Decisions Every product design decision grounded in real user behavior. Research insights drive roadmaps, feature prioritization, and validated interaction models.	Agile Product Delivery Designing within sprint cycles, contributing User Stories, Acceptance Criteria, and sprint-ready specifications. Agile fluency as a delivery advantage, not a separate discipline.

CORE COMPETENCIES

End-to-End Product Design

- Discovery, user research, IA, wireframing, prototyping, design QA, validated delivery
- Human-centered design lifecycle - from first insight to shipped product
- UX architecture embedded in product thinking - structure before surface
- Rapid ideation, concept validation, and iterative design refinement

User Research and Validation

- Contextual inquiry, stakeholder interviews, field user research
- Usability testing, heuristic evaluation, competitive landscape analysis
- Journey mapping, persona creation, empathy mapping - insights to roadmaps

AI Product Design

- Conversational UX and natural language interface design (SmartBI)
- Human-in-the-loop product architecture for LLM-powered enterprise systems
- AI workflow integration - Antigravity, Gemini, Claude, Codex, Framer

Enterprise Product Strategy and Craft

- B2B SaaS product design - multi-role, enterprise-scale, partner ecosystems
- Stakeholder alignment and business-to-design translation
- Component libraries, design tokens, Figma-based systems architecture
- KPI-driven design outcomes - 15% partner satisfaction uplift achieved
- Agile UX Delivery - sprint-integrated design

AI UX TOOLKIT AND PRODUCT DESIGN METHODOLOGY STACK

UX & Architecture Tools: Figma (IA mapping, flows, component systems), Framer (interactive prototyping), Miro (journey mapping, structural workshops), Sketch, Anima

AI Orchestration: Antigravity, Gemini, Claude, Codex, Open Design, Google Stitch, Google AI Studio, UX Pilot

AI-Augmented Workflows: Using Claude, Gemini and Antigravity for IA synthesis, journey map generation, user story drafting, acceptance criteria writing, and design documentation acceleration

Research & UX Foundations: Prompt Engineering for UX Research, WCAG 2.1 Accessibility, HCD, Design Thinking, Lean UX

Frameworks: Human-Centered Design, Information Architecture, Design Systems, Lean Product Lifecycle, Agile UX Integration

ENTERPRISE PRODUCT DESIGN - FEATURED WORK

SmartBI

Lead UX Architect

Antigravity, Gemini, Claude, Google Stitch, Figma

Architected an enterprise conversational AI platform that translates complex SQL queries and multi-layered data into an intuitive natural language interface. Designed the human-in-the-loop verification layer, data transparency architecture, and zero-trust security UX compliance model for non-technical enterprise stakeholders.

SYSTEMS THINKING

Feel the experience

SENTINEL

Principal UX Architect

AI-Driven PM Ecosystem

Architected an empathetic AI orchestration interface designed to automate high-frequency, low-value administrative overhead for engineering teams. Applied cognitive load mapping to surface high-signal tasks and suppress operational noise, enabling teams to refocus on strategic delivery.

TRACTO

Lead UX Architect

Connected Healthcare Network

Designed a data-driven safety and health monitoring ecosystem for elderly care. Mapped real-time biometric streams to cognitive safety triggers, establishing glanceable, high-contrast dashboard interfaces engineered specifically for low-literacy and low-tech-proficiency users.

PROFESSIONAL EXPERIENCE

TenXengage

Oct 2023 - May 2026

Sr. UX Designer > UX Architect

Note: Geni restructured into TenXengage in Oct 2023. Same founding team, clients (Google, Cisco), and projects continued. Formally elevated to UX Architect in recognition of systems architecture responsibilities handled since joining predecessor entity Geni.

Strategic UX Architect leading end-to-end user experience and interaction design within Google and Cisco partner networks, engineering scalable B2B frameworks through rigorous Agile collaboration.

ENTERPRISE UX & ARCHITECTURE

- Applied systems thinking to map and optimize complex B2B SaaS workflows across Google and Cisco partner ecosystems, defining intuitive navigation models, data schemas, and platform-wide information architecture that scaled across global implementations.
- Directed overarching UX strategy for multi-regional partner portals, establishing structural design standards and governance frameworks that unified experience quality across all partner-facing touchpoints.
- Led end-to-end user research and journey mapping initiatives, translating behavioral insights and field observations into concrete architectural blueprints, feature roadmaps, and validated interaction models that drove measurable reduction in task completion friction.

TECHNICAL UX & AGILE COLLABORATION

- Facilitated engineering feasibility reviews at design inception, aligning UX proposals against API constraints, technical dependencies, and systemic limitations before committing to sprint scope, eliminating late-cycle redesign loops.
- Translated complex UX layouts and multi-state user flows into refined sprint backlogs, well-structured User Stories, and precise Acceptance Criteria ensuring engineering teams had unambiguous, dev-ready specifications at every handoff.
- Maintained design integrity across the full sprint lifecycle by proactively resolving cross-functional UX dependencies, clearing blocking issues, and conducting design QA reviews prior to release.
- Served as the primary interface between business stakeholders and engineering teams, protecting the user vision during implementation while aligning delivery against business KPIs and sprint velocity.
- Acted as Agile champion across cross-functional pods, facilitating sprint planning, daily stand-ups, retrospectives, and sprint reviews while simultaneously owning the design backlog.
- Integrated AI tools (Claude, Gemini, Antigravity) into sprint workflows, generating draft user stories, acceptance criteria, and sprint retrospectives, cutting documentation time and accelerating backlog readiness.

Geni

Feb 2021 - Sep 2023

Sr. UX Designer

Note: Predecessor legal entity to TenXengage (uninterrupted employment with same team, clients, and projects). Performed UX Architect duties throughout under the title Sr. UX Designer.

ENTERPRISE UX & ARCHITECTURE

- Architected information structures for complex B2B SaaS partner portals across Google and Cisco ecosystems, defining end-to-end navigation models, data schemas, and content hierarchies that formed the structural backbone of multi-role platform experiences.
- Established foundational UX strategy and design standards across partner-facing platforms, creating structural frameworks, pattern libraries, and governance guidelines that ensured consistency and scalability across global rollouts.
- Led user research programs and journey mapping exercises, transforming qualitative findings, behavioral data, and stakeholder inputs into validated architectural blueprints, experience frameworks, and feature-level roadmaps.

TECHNICAL UX & CROSS-FUNCTIONAL EXECUTION

- Conducted engineering alignment sessions at design inception, evaluating UX proposals against technical feasibility, API structures, and platform constraints to eliminate costly late-cycle rework.
- Translated complex interaction models and multi-state user flows into structured design specifications, user stories, and acceptance criteria providing engineering teams with unambiguous, sprint-ready handoff documentation.
- Maintained design integrity across delivery cycles, resolving cross-functional dependencies, conducting design review checkpoints, and ensuring implementation fidelity against original UX intent.
- Functioned as the bridge between business stakeholders and engineering, translating strategic goals and user needs into a shared delivery language, protecting the user vision through every sprint.

Senior UX Designer

- Architected an AI-driven corporate travel and forex solution platform, simplifying complex business logic into frictionless, linear screen architectures through iterative wireframe cycles.
- Collaborated within an Agile delivery structure where daily syncs, sprint demos, and retrospective-driven design iterations reduced rework across engineering sprints.

Ayantek

Apr 2017 - Jan 2020

Lead UX Designer

- Executed end-to-end UX strategy for a diverse B2B SaaS portfolio, managing design sprints grounded in intensive user research and core business KPIs.
- Led stakeholder alignment sessions that translated abstract product visions into structured user stories and sprint-ready low-to-high fidelity prototypes.
- Coordinated cross-disciplinary teams (design, development, QA) through Agile-style delivery loops, reducing post-sprint design revision cycles significantly.

CodeLogics

Aug 2013 - Apr 2017

Design Manager

- Managed design output for multi-client product teams, translating abstract client visions into comprehensive user stories, dev-ready prototypes, and sprint documentation.
- Established design review cadences aligned with sprint ceremonies, preventing implementation drift and reducing engineering rework.

Playgames24x7 (RummyCircle)

May 2012 - Sep 2013

Product Designer (Senior Creative)

- Conceptualized the Main Game Table interaction model, optimizing interaction patterns iteratively through rapid usability cycles to minimize cognitive load for millions of concurrent users.

CAREER EVOLUTION (2003-2012)

HurixDigital Lean UI Designer (2011-12)	Nat Geo, Star India Client Projects	RoyTech Software UI Manager (2008-11)	Freelance Visual Identity (2005-08)	Aforeserve.com Jr. Web Designer (2003-05)
---	---	---	---	---

PROFESSIONAL CERTIFICATIONS

- **IIT Roorkee** - Executive Postgraduate Certification in UI/UX Design (2024-25) - cognitive psychology, enterprise navigation frameworks, data display mechanics.
- **IxDF** - AI for Designers Professional Certification (2026) - AI orchestration, LLM prompt refinement, human-in-the-loop UX.
- **IxDF** - Perception and Memory in HCI and UX - cognitive load principles applicable to complex interface design.
- IxDF Profile: ixdf.org/members/sayantana-ghosh

EDUCATION

- **Arena Animation** - Professional Diploma in Web Design and Multimedia
- **West Bengal Council of Higher Secondary Education** - Commerce Stream (10+2), 2001
