

# SAYANTAN GHOSH

Senior UX Designer and Architect | Interaction Design | Enterprise B2B and AI Interfaces

Immediate Joiner    Open to Relocation

Location: Hyderabad, India  
Email: ghosh.sayantan1982@gmail.com  
LinkedIn: linkedin.com/in/uxsayantan  
Phone: +91 9959629041  
Web: [uxsayantan.com](https://uxsayantan.com)

22+  
YEARS TOTAL EXPERIENCE

9  
YEARS UX & INTERACTION DESIGN

13  
YEARS VISUAL & UI DESIGN

## PROFILE

Across 22+ years of enterprise design, I have delivered interaction-rich B2B SaaS solutions. At Geni and TenXengage, I brought architectural depth to Google and Cisco partner ecosystems, designing everything from granular interaction patterns to end-to-end user journeys and information architectures. My practice builds from the skeleton outward, structuring navigation and research before crafting the visual layer. The UX Architect designation I earned at TenXengage reflects this structural and systems thinking. I integrate AI orchestration (Claude, Gemini, Antigravity) to accelerate research synthesis and user stories, working natively inside Agile sprints to ensure seamless handoffs and design fidelity.

## EXECUTIVE VALUE PROPOSITION

### Interaction Complexity Reduction

Translating complex enterprise workflows, data structures, and multi-role partner portals into clear, intuitive interaction patterns for global B2B users (Google and Cisco).

### Architecture-First Design Craft

Approaching UX from the structural skeleton outward - IA, navigation models, and system-wide patterns before surface-level interaction and visual design.

### Research-Grounded Design

Every design decision backed by real user research - contextual inquiry, usability testing, and behavioural analysis driving interaction patterns, layouts, and user flows.

### AI-Augmented UX Workflow

Integrating AI tools (Claude, Gemini, Antigravity, Framer) into the design workflow, accelerating research synthesis, journey mapping, and design documentation.

### Enterprise B2B UX Craft

Deep experience designing multi-role, permission-based interfaces for complex B2B SaaS - partner portals, healthcare networks, fintech platforms, and AI-powered dashboards.

### Agile-Integrated Design Delivery

Delivering design within sprint cycles - wireframes, specs, and design QA embedded in the engineering delivery loop. Agile fluency as a practical delivery advantage.

## CORE COMPETENCIES

### Interaction Design and UX Craft

- User flows, wireframing (low-to-high fidelity), interactive prototyping
- Multi-state and multi-role interaction pattern design for enterprise B2B
- Micro-interaction design and UI behaviour specification
- Visual hierarchy, typography, layout systems, and responsive design

### User Research and Usability

- Contextual inquiry, field research, stakeholder interviews, survey design
- Usability testing - moderated and unmoderated, heuristic evaluation
- Journey mapping, empathy mapping, persona creation, competitive analysis

### Information Architecture

- Navigation model design - multi-role, multi-hierarchy, enterprise-scale B2B
- Data schema and content hierarchy definition for complex SaaS workflows
- Structural pattern design - scalable and consistent across platform touchpoints

### Enterprise B2B, AI Interfaces and Tools

- Partner portal UX - Google and Cisco ecosystems (22+ years experience)
- AI interface design - conversational, human-in-the-loop, LLM-powered products
- Accessibility - WCAG 2.1 compliance and inclusive design standards
- Figma, Framer, Miro, Sketch, Anima, Claude, Gemini, Antigravity
- Agile UX Delivery - design embedded in sprints (Advantage)

## AI UX TOOLKIT AND DESIGN METHODOLOGY STACK

**UX & Architecture Tools:** Figma (IA mapping, flows, component systems), Framer (interactive prototyping), Miro (journey mapping, structural workshops), Sketch, Anima

**AI Orchestration:** Antigravity, Gemini, Claude, Codex, Open Design, Google Stitch, Google AI Studio, UX Pilot

**AI-Augmented Workflows:** Using Claude, Gemini and Antigravity for IA synthesis, journey map generation, user story drafting, acceptance criteria writing, and design documentation acceleration

**Research & UX Foundations:** Prompt Engineering for UX Research, WCAG 2.1 Accessibility, HCD, Design Thinking, Lean UX

**Frameworks:** Human-Centered Design, Information Architecture, Design Systems, Lean Product Lifecycle, Agile UX Integration (Advantage)

## ENTERPRISE PRODUCT DESIGN - FEATURED WORK

## SmartBI

### Lead UX Architect

*Antigravity, Gemini, Claude, Google Stitch, Figma*

Architected an enterprise conversational AI platform that translates complex SQL queries and multi-layered data into an intuitive natural language interface. Designed the human-in-the-loop verification layer, data transparency architecture, and zero-trust security UX compliance model for non-technical enterprise stakeholders.

#### SYSTEM THINKING

Feel the experience

## SENTINEL

### Principal UX Architect

*AI-Driven PM Ecosystem*

Architected an empathetic AI orchestration interface designed to automate high-frequency, low-value administrative overhead for engineering teams. Applied cognitive load mapping to surface high-signal tasks and suppress operational noise, enabling teams to refocus on strategic delivery.

## TRACTO

### Lead UX Architect

*Connected Healthcare Network*

Designed a data-driven safety and health monitoring ecosystem for elderly care. Mapped real-time biometric streams to cognitive safety triggers, establishing glanceable, high-contrast dashboard interfaces engineered specifically for low-literacy and low-tech-proficiency users.

## PROFESSIONAL EXPERIENCE

### TenXengage

Oct 2023 - May 2026

#### Sr. UX Designer > UX Architect

*Note: Geni restructured into TenXengage in Oct 2023. Same founding team, clients (Google, Cisco), and projects continued. Formally elevated to UX Architect in recognition of systems architecture responsibilities handled since joining predecessor entity Geni.*

*Strategic UX Architect leading end-to-end user experience and interaction design within Google and Cisco partner networks, engineering scalable B2B frameworks through rigorous Agile collaboration.*

#### ENTERPRISE UX & ARCHITECTURE

- Applied systems thinking to map and optimize complex B2B SaaS workflows across Google and Cisco partner ecosystems, defining intuitive navigation models, data schemas, and platform-wide information architecture that scaled across global implementations.
- Directed overarching UX strategy for multi-regional partner portals, establishing structural design standards and governance frameworks that unified experience quality across all partner-facing touchpoints.
- Led end-to-end user research and journey mapping initiatives, translating behavioral insights and field observations into concrete architectural blueprints, feature roadmaps, and validated interaction models that drove measurable reduction in task completion friction.

#### TECHNICAL UX & AGILE COLLABORATION

- Facilitated engineering feasibility reviews at design inception, aligning UX proposals against API constraints, technical dependencies, and systemic limitations before committing to sprint scope, eliminating late-cycle redesign loops.
- Translated complex UX layouts and multi-state user flows into refined sprint backlogs, well-structured User Stories, and precise Acceptance Criteria ensuring engineering teams had unambiguous, dev-ready specifications at every handoff.
- Maintained design integrity across the full sprint lifecycle by proactively resolving cross-functional UX dependencies, clearing blocking issues, and conducting design QA reviews prior to release.
- Served as the primary interface between business stakeholders and engineering teams, protecting the user vision during implementation while aligning delivery against business KPIs and sprint velocity.
- Acted as Agile champion across cross-functional pods, facilitating sprint planning, daily stand-ups, retrospectives, and sprint reviews while simultaneously owning the design backlog.
- Integrated AI tools (Claude, Gemini, Antigravity) into sprint workflows, generating draft user stories, acceptance criteria, and sprint retrospectives, cutting documentation time and accelerating backlog readiness.

### Geni

Feb 2021 - Sep 2023

#### Sr. UX Designer

*Note: Predecessor legal entity to TenXengage (uninterrupted employment with same team, clients, and projects). Performed UX Architect duties throughout under the title Sr. UX Designer.*

#### ENTERPRISE UX & ARCHITECTURE

- Architected information structures for complex B2B SaaS partner portals across Google and Cisco ecosystems, defining end-to-end navigation models, data schemas, and content hierarchies that formed the structural backbone of multi-role platform experiences.
- Established foundational UX strategy and design standards across partner-facing platforms, creating structural frameworks, pattern libraries, and governance guidelines that ensured consistency and scalability across global rollouts.
- Led user research programmes and journey mapping exercises, transforming qualitative findings, behavioral data, and stakeholder inputs into validated architectural blueprints, experience frameworks, and feature-level roadmaps.

#### TECHNICAL UX & CROSS-FUNCTIONAL EXECUTION

- Conducted engineering alignment sessions at design inception, evaluating UX proposals against technical feasibility, API structures, and platform constraints to eliminate costly late-cycle rework.
- Translated complex interaction models and multi-state user flows into structured design specifications, user stories, and acceptance criteria providing engineering teams with unambiguous, sprint-ready handoff documentation.
- Maintained design integrity across delivery cycles, resolving cross-functional dependencies, conducting design review checkpoints, and ensuring implementation fidelity against original UX intent.
- Functioned as the bridge between business stakeholders and engineering, translating strategic goals and user needs into a shared delivery language, protecting the user vision through every sprint.

Senior UX Designer

- Architected an AI-driven corporate travel and forex solution platform, simplified complex business logic into frictionless, linear screen architectures through iterative wireframe cycles.
- Collaborated within an Agile delivery structure, daily syncs, sprint demos and retrospective-driven design iterations reduced rework across engineering sprints.

Ayantek

Apr 2017 - Jan 2020

Lead UX Designer

- Executed end-to-end UX strategy for a diverse B2B SaaS portfolio, managed design sprints grounded in intensive user research and core business KPIs.
- Led stakeholder alignment sessions that translated abstract product visions into structured user stories and sprint-ready low-to-high fidelity prototypes.
- Coordinated cross-disciplinary teams (design, development, QA) through agile-style delivery loops, reducing post-sprint design revision cycles significantly.

CodeLogics

Aug 2013 - Apr 2017

Design Manager

- Managed design output for multi-client product teams, translating abstract client visions into comprehensive user stories, dev-ready prototypes and sprint documentation.
- Established design review cadences aligned with sprint ceremonies, preventing implementation drift and reducing engineering re-work.

Playgames24x7 (RummyCircle)

May 2012 - Sep 2013

Product Designer (Senior Creative)

- Conceptualized the Main Game Table interaction model, optimized interaction patterns iteratively through rapid usability cycles, minimizing cognitive load for millions of concurrent users.

CAREER EVOLUTION (2003-2012)

|                                                   |                                               |                                                 |                                               |                                                     |

PROFESSIONAL CERTIFICATIONS

- **IIT Roorkee** - Executive Postgraduate Certification in UI/UX Design (2024-25) - cognitive psychology, enterprise navigation frameworks, data display mechanics.
- **IxDF** - AI for Designer Professional Certification (2026) - AI orchestration, LLM prompt refinement, human-in-the-loop UX.
- **IxDF** - Perception and Memory in HCI and UX - cognitive load principles applicable to complex interface design.
- IxDF Profile: [ixdf.org/members/sayantana-ghosh](https://ixdf.org/members/sayantana-ghosh)

EDUCATION

- **Arena Animation** - Professional Diploma in Web Design and Multimedia
- **West Bengal Council of Higher Secondary Education** - Commerce Stream (10+2), 2001
