

22+ YEARS TOTAL EXPERIENCE	13 YEARS FOUNDATION (VISUAL & UI)	9 YEARS RECENT (UX & ARCHITECTURE)	AI-DRIVEN FULL-STACK PROTOTYPING
----------------------------------	---	--	-------------------------------------

I single-handedly drive products from initial UX architecture to fully functional, deployed software. I do not stop at UI design. By orchestrating AI agents as my engineering team, I translate complex user needs and business logic into production-ready frontends, robust backends, and complete platforms. Because I hold the clear structural vision and know exactly what the product must achieve, I direct the AI to execute the technical heavy lifting - bridging the gap between human design intent and final, shipped software.

PROFILE

Across 22+ years of enterprise design, I have practiced UX at an architectural level, building structural foundations that make complex products navigable and scalable. My systems approach is grounded in 6.5 years of concurrent freelance UX research, translating behavioral insights into structural blueprints. At TenXengage, I led end-to-end UX architecture for Google and Cisco partner ecosystems to drive a 15% uplift in partner satisfaction. Today, I operate beyond traditional UX Architecture as a Full-Cycle AI Product Architect. I leverage AI to accelerate IA mapping and design validation, while concurrently orchestrating AI to engineer fully functional full-stack applications (Laravel, PHP, MySQL), bridging the gap between strategic vision and technical reality.

EXECUTIVE VALUE PROPOSITION

Structural Complexity Reduction Transforming multi-layered enterprise SaaS workflows into scalable, architecturally sound information structures across Google and Cisco global partner ecosystems.	Systems-Level Thinking Designing platform-wide IA frameworks, navigation models, and structural design standards ensuring consistency and scalability across enterprise product suites.	Business-Architecture Alignment Translating abstract stakeholder visions into structured user architectures, feature blueprints, and validated interaction frameworks aligned to business KPIs.
AI-Augmented Architecture Embedding AI tools (Claude, Gemini, Antigravity) into the architectural design process, accelerating IA mapping, journey synthesis, and design documentation at scale.	Research-Led Structural Design Grounding every architectural decision in real user research. Behavioral insights, journey mapping, and usability validation feed directly into IA and interaction blueprints.	Technical UX Alignment Facilitating engineering feasibility reviews, API constraint evaluations, and design-to-dev specification to ensure architectural intent survives the full implementation cycle.

CORE COMPETENCIES

Information Architecture and Systems Design - End-to-end IA mapping for complex B2B SaaS partner portal ecosystems - Navigation model design - multi-role, multi-hierarchy, enterprise-scale - Data schema, content structure, and structural hierarchy definition - Platform-wide structural standards and scalability frameworks	Design System Governance - Component library architecture and token-based design system design - Cross-platform consistency frameworks and governance protocols - Structural pattern library documentation and engineering handoff standards
Technical UX Alignment - Engineering feasibility reviews - API constraints, systemic dependencies - UX-to-dev specification - User Stories, Acceptance Criteria, annotated flows - Design QA and implementation fidelity assurance across sprint cycles	Research-Led Architecture and AI UX - User research - contextual inquiry, stakeholder interviews, field studies - Journey mapping and behavioral analysis translated into architectural blueprints - Conversational AI interface architecture - SmartBI, Sentinel, Tracto - Human-in-the-loop UX design for LLM-powered enterprise products - Agile UX Delivery - sprint planning, backlog contribution

AI UX TOOLKIT AND ARCHITECTURE METHODOLOGY STACK

UX & ARCHITECTURE TOOLS

Figma (IA mapping, flows, component systems), Framer (interactive prototyping), Miro (journey mapping, structural workshops), Sketch, Anima

AI ORCHESTRATION

Antigravity, Gemini, Claude, Codex, Open Design, Google Stitch, Google AI Studio, UX Pilot

AI-AUGMENTED WORKFLOWS

Using Claude, Gemini and Antigravity for IA synthesis, journey map generation, user story drafting, acceptance criteria writing, and design documentation acceleration

AI-ASSISTED DEVELOPMENT

Translating UX architecture into fully functional applications and production-ready code across any tech stack by orchestrating AI agents, bridging the gap between design and technical execution.

RESEARCH & UX FOUNDATIONS

Prompt Engineering for UX Research, WCAG 2.1 Accessibility, HCD, Design Thinking, Lean UX

FRAMEWORKS

Human-Centered Design, Information Architecture, Design Systems, Lean Product Lifecycle, Agile UX Integration

ENTERPRISE PRODUCT DESIGN - FEATURED WORK

Asparz

UX Consultant & Architect

Enterprise SSL Management SaaS

Led deep-dive UX research and architected an actionable dashboard for IT administrators, simplifying dense cryptographic data. Designed predictive alerting mechanisms and streamlined renewal workflows, drastically improving data visibility and platform adoption.

Govt Guest Booking

AI Product Architect

100% AI-Driven Platform Development

Architected and deployed a fully functional booking platform by utilizing AI as an integrated engineering partner. Bridged the gap between UX vision and technical execution by orchestrating AI to generate a functional frontend, robust backend logic, and complex RBAC systems, proving design feasibility at scale.

Design OS for AI

Conceptual Framework

Knowledge Engineering

Pioneering a conceptual framework to transfer high-level human design intuition into AI models. Systematically teaching human-centered design to AI agents, translating complex design principles into structured, programmable logic for autonomous architectural decisions.

tenXengage

UX Architect

Workflow Redesign (Cisco & Google)

AI predicted business outcomes, but users still faced 40+ manual steps. Diagnosed the cognitive load gap, restructured the UX architecture, and delivered wireframes to redirect AI assistance directly to the creation flow.

Outcome: 30% engagement rise, 22% support cost drop, 20-25% ticket reduction.

VIEW CASE STUDY | uxsayantan.com

SmartBI

Lead UX Architect

Antigravity, Gemini, Claude, Google Stitch, Figma

Architected an enterprise conversational AI platform that translates complex SQL queries and multi-layered data into an intuitive natural language interface. Designed the human-in-the-loop verification layer, data transparency architecture, and zero-trust security UX compliance model for non-technical enterprise stakeholders.

SYSTEMS THINKING

Feel the experience

TRACTO

Lead UX Architect

Connected Healthcare Network

Designed a data-driven safety and health monitoring ecosystem for elderly care. Mapped real-time biometric streams to cognitive safety triggers, establishing glanceable, high-contrast dashboard interfaces engineered specifically for low-literacy and low-tech-proficiency users.

PROFESSIONAL EXPERIENCE

Freelance UX Consultant & AI Product Architect
Independent Consultant

Jan 2020 - Present

Strategic UX Consultant and Lead Researcher bridging the gap between deep human insights, enterprise architecture, and high-velocity technical execution.

- Led deep-dive UX research and designed predictive alerting mechanisms for enterprise SSL management platforms, drastically improving data visibility and platform adoption.
- Single-handedly architected and developed a comprehensive, multi-tiered booking platform by orchestrating AI as an integrated development partner.
- Pioneering workflows that leverage AI to generate production-ready PHP/MySQL backend logic, dynamic HTML/CSS/JS frontends, and robust RBAC systems.
- Building a foundational "Design OS" methodology to transfer high-level human design intuition into LLMs, shifting AI from code generator to strategic design partner.

TenXengage
Sr. UX Designer > UX Architect

Oct 2023 - May 2026

Note: Geni restructured into TenXengage in Oct 2023. Same founding team, clients (Google, Cisco), and projects continued. Formally elevated to UX Architect in recognition of systems architecture responsibilities handled since joining predecessor entity Geni.

Strategic UX Architect leading end-to-end user experience and interaction design within Google and Cisco partner networks, engineering scalable B2B frameworks through rigorous Agile collaboration.

ENTERPRISE UX & ARCHITECTURE

- Applied systems thinking to map and optimize complex B2B SaaS workflows across Google and Cisco partner ecosystems, defining intuitive navigation models, data schemas, and platform-wide information architecture that scaled across global implementations.
- Directed overarching UX strategy for multi-regional partner portals, establishing structural design standards and governance frameworks that unified experience quality across all partner-facing touchpoints.
- Led end-to-end user research and journey mapping initiatives, translating behavioral insights and field observations into concrete architectural blueprints, feature roadmaps, and validated interaction models that drove measurable reduction in task completion friction.

TECHNICAL UX & AGILE COLLABORATION

- Facilitated engineering feasibility reviews at design inception, aligning UX proposals against API constraints, technical dependencies, and systemic limitations before committing to sprint scope, eliminating late-cycle redesign loops.
- Translated complex UX layouts and multi-state user flows into refined sprint backlogs, well-structured User Stories, and precise Acceptance Criteria ensuring engineering teams had unambiguous, dev-ready specifications at every handoff.
- Maintained design integrity across the full sprint lifecycle by proactively resolving cross-functional UX dependencies, clearing blocking issues, and conducting design QA reviews prior to release.
- Served as the primary interface between business stakeholders and engineering teams, protecting the user vision during implementation while aligning delivery against business KPIs and sprint velocity.
- Acted as Agile champion across cross-functional pods, facilitating sprint planning, daily stand-ups, retrospectives, and sprint reviews while simultaneously owning the design backlog.
- Integrated AI tools (Claude, Gemini, Antigravity) into sprint workflows, generating draft user stories, acceptance criteria, and sprint retrospectives, cutting documentation time and accelerating backlog readiness.

Note: Predecessor legal entity to TenXengage (uninterrupted employment with same team, clients, and projects). Performed UX Architect & Researcher duties throughout under the title Sr. UX Designer.

ENTERPRISE UX & ARCHITECTURE

- Architected information structures for complex B2B SaaS partner portals across Google and Cisco ecosystems, defining end-to-end navigation models, data schemas, and content hierarchies that formed the structural backbone of multi-role platform experiences.
- Established foundational UX strategy and design standards across partner-facing platforms, creating structural frameworks, pattern libraries, and governance guidelines that ensured consistency and scalability across global rollouts.
- Led comprehensive user research initiatives (contextual inquiry, interviews, card sorting, tree testing) and journey mapping workshops, transforming qualitative findings and behavioral metrics into validated architectural blueprints and experience frameworks.

TECHNICAL UX & CROSS-FUNCTIONAL EXECUTION

- Conducted engineering alignment sessions at design inception, evaluating UX proposals against technical feasibility, API structures, and platform constraints to eliminate costly late-cycle rework.
- Translated complex interaction models and multi-state user flows into structured design specifications, user stories, and acceptance criteria providing engineering teams with unambiguous, sprint-ready handoff documentation.
- Maintained design integrity across delivery cycles, resolving cross-functional dependencies, conducting design review checkpoints, and ensuring implementation fidelity against original UX intent.
- Functioned as the bridge between business stakeholders and engineering, translating strategic goals and user needs into a shared delivery language, protecting the user vision through every sprint.

FastCollab

Senior UX Designer

May 2020 - Feb 2021

- Architected an AI-driven corporate travel and forex solution platform, simplifying complex business logic into frictionless, linear screen architectures through iterative wireframe cycles.
- Collaborated within an Agile delivery structure where daily syncs, sprint demos, and retrospective-driven design iterations reduced rework across engineering sprints.

Ayantek

Lead UX Designer

Apr 2017 - Jan 2020

- Executed end-to-end UX strategy for a diverse B2B SaaS portfolio, managing design sprints grounded in intensive user research and core business KPIs.
- Led stakeholder alignment sessions that translated abstract product visions into structured user stories and sprint-ready low-to-high fidelity prototypes.
- Coordinated cross-disciplinary teams (design, development, QA) through Agile-style delivery loops, reducing post-sprint design revision cycles significantly.

CodeLogics

Design Manager

Aug 2013 - Apr 2017

- Managed design output for multi-client product teams, translating abstract client visions into comprehensive user stories, dev-ready prototypes, and sprint documentation.
- Established design review cadences aligned with sprint ceremonies, preventing implementation drift and reducing engineering rework.

Playgames24x7 (RummyCircle)

Product Designer (Senior Creative)

May 2012 - Sep 2013

- Conceptualized the Main Game Table interaction model, optimizing interaction patterns iteratively through rapid usability cycles to minimize cognitive load for millions of concurrent users.

CAREER EVOLUTION (2003-2012)

HurixDigital

Lead UI Designer (2011-12)

Nat Geo, Star India

Client Projects

RoyTech Software

UI Manager (2008-11)

Freelance

Visual Identity (2005-08)

Aforeserve.com

Jr. Web Designer (2003-05)

PROFESSIONAL CERTIFICATIONS

- **IIT Roorkee** - Executive Postgraduate Certification in UI/UX Design (2024-25) - cognitive psychology, enterprise navigation frameworks, data display mechanics.
- **IxDF** - AI for Designers Professional Certification (2026) - AI orchestration, LLM prompt refinement, human-in-the-loop UX.
- **IxDF** - Perception and Memory in HCI and UX - cognitive load principles applicable to complex interface design.
- IxDF Profile: ixdf.org/members/sayantana-ghosh

EDUCATION

- **Arena Animation** - Professional Diploma in Web Design and Multimedia
- **West Bengal Council of Higher Secondary Education** - Commerce Stream (10+2), 2001
